REVIEW OF OIL.

"The Scout" Summarizes Conditions in the Southwest.

HIGH PRICE OF REFINED OIL

Ought to Bring About \$2 Crude Oil, But It Hasn't, and Thereby Hangs a Tale—The Pipe Line Report Analyzed to Show That the Producer Ought to Benefit by the Advances in Refined—Operations in the Field.

The pipe line report for the month of December, just issued, presents food for thought and will be read not only by the producing element with interest, but by every one engaged in the various branches of the great industry. The report shows that the exports of petroleum and its different products are below those for the past ten months, yet they are above the shipments for December in the year 1898. In this connection particular attention is directed to the increase in cash returns, and while we have shipped considerable less oil, the amount received for it shows a remarkably large percentage in gain. The year 1899, compared with 1898, indicates by the official figures that there were over 35,000,000 gallons less oil sent abroad in the year just closed than in 1898, but on the other hand over \$12,000,000 more was received for it. Export oil commands two and a half cents more at the present time than it did at this time in December, 1898, and this is due to the prevailing price for export oil delivered in bulk on board tank steamers at the port of New York, is 7.40 cents per gallon, the highest quotations that have ruled for some time.

Upon the basis of the refined market, crude should bring higher prices, and just why the crude market does not keep pace with the refined product is a question the producers fail to understand. They really realize that at this period of the year refined and bi-products are not in great demand, yet they think when refined commands the present high price it does there is no logical reason why the producers should not share in the advance. They can find no bearish conditions in the field situation and unhesitatingly would be receiving at least \$2 a barrel for their product. A comparison with past reports of the various pipe lines shows that the exports for the entire year of 1899 were less than they have been since 1896, while at the same time the cash returns were greater than any previous year. In 1898, according to the reports, the month of August showed the largest shipments in the history of the trade, and this was not only true in the number of gallons exported, but also in valuation and established a record not likely to be broken. The amount shipped in September was considerably below the figures for August, footing up about seven and a half million gallons, but owing to the great demand and buoyant market, the amount in value was in the neighborhood of half a million dollars greater. This was certainly a banner month, as a careful comparison of past reports show that September was the first time in the history of the trade that American export shipments of oil amounted to more than seven million dollars in value. As compared with September, the shipments in the month of October were more than nine and one-half million gallons in amount, and nearly a hundred thousand dollars less in valuation, but nevertheless, was quite a good record in every particular. So did the November report show a falling off with October and the record was over 4,000,000 gallons in amount and nearly \$90,000 in valuation. The shipments in December show a decided falling off, as compared with the previous month, the decline in cash returns being over \$1,200,000. In December, 1899, there was an increase of almost 120,000 gallons and more than \$1,250,000 in money received for it above the record for December, 1898. In comparison with that of the same month in 1898, a gain is shown of nearly \$2,000,000 in value and almost 6,000,000 gallons in amount.

The month October recorded yet a larger increase, both in amount and value as compared with the same month in 1898. For the month of September, the total exports of mineral oil products were between four and five million gallons more than in September, 1898, while the increase in value was over two and one-quarter million dollars. In the month of August the shipments of American oil were almost three million gallons more than they were for the month of August of the year previous, while the increase in valuation footed up over \$1,500,000. In July the shipments of export oil fell off from those in June, 1898, by more than 8,000,000 gallons, but in valuation the gain was a net million and a half in cash returns. It is shown by the United States treasury department and the official reports that the exports of mineral oils for the month of December, which embraces crude, illuminating, lubricating oils, etc., amounted to \$5,311,073. For December, 1899, they amounted to \$5,870,419, bringing a net cash return of \$1,184,257, which is an increase of 12,124 gallons and in valuation \$1,251,770. The December export decreased, as compared with November, 17,587,679 gallons, and in valuation \$1,154,226.

At the close of December, 1899, the reports show that our total exports of crude, naphtha, illuminating, lubricating oil, residuum, etc., for the twelve months, amounted to \$51,024,441 gallons, and in valuation, \$94,837,546. This is about \$2,500,000 gallons less than the preceding twelve months, but the valuation on cash returns is \$12,451,201 greater and the heaviest for any preceding year in the history of the petroleum industry. Thus it will be observed by the foregoing reports that the appreciation in values has more than made good the falling off in the foreign demand for American oil.

In the year 1898, the total exports of petroleum and its bi-products were 396,480,810 gallons, upon which was placed a valuation of \$52,551,048. For the year 1899, they were 394,257,753 gallons, valued at \$52,057,541. For 1898 the exports footed up \$51,785,022 gallons, in value, and in valuation \$74,743,373, while in 1899 our exports amounted to 383,126,130 gallons, bringing a cash return of \$50,224,425. The reports of the exports of crude and refined petroleum, lubricating oils, naphtha and residuum for October were 32,135,155 gallons, valued at \$5,427,038, while for October, 1898, they footed up 29,524,527 gallons, valued at \$4,612,148. This shows an increase of 2,610,628 gallons, and in cash returns of \$1,784,890. Our exports for October fell off from September, 9,512,622 gallons and the corresponding decrease in valuation was \$579,550. The steady appreciation in value of American petroleum exports without question demonstrated their superiority over all foreign products, and that the American refiner is able to demand a price for his products, and also that the foreign situation has wonderfully improved since the beginning of the year. The healthy condition of our trade in the markets abroad is seen by the prices which have prevailed. The average price of refined oil for export in New York has advanced from 7.30 cents in September to 9 cents in December. The distribu-

tion of our exports for December were as follows: Crude, 10,947,358 gallons; naphtha, 21,150 gallons; lubricating oil, 1,742,255 gallons; residuum, 491,440 gallons. From New York there were shipped 22,573,554 gallons; Philadelphia, 17,573,571 gallons; Delaware, 1,742,255 gallons; Baltimore, 2,187,773 gallons; and from Baltimore 69,297 gallons.

Another week in the world of oil has passed into history without any material change in the general situation. The same bullish tendency that has characterized the trade for the past six months still prevails, and at this writing there is nothing in sight to change the present situation. The refined market remains firm, although the demand for it is not as great as it has been. Crude for some reason does not seem to keep in sympathy with the refined products, and as yet no one has ventured the opinion why this is so. Reports from field operations indicated a falling off in new operations in every section, from the polar regions to the southern limit of the sunny southwest district. The experimental drill, however, is still in as much evidence as ever, and if anything, this class of work is on the increase. While nothing of great importance has taken place in the field, there were one or two new strikes made during the week, in which considerable interest is manifested.

Perhaps the most important discovery is the new well located on the Tazewell farm, Lewis county, in the Camden district. The new well is owned principally by Parkersburg parties, but just what it will amount to when the thoroughly tested remains to be seen. The drill tapped the pay in this well Friday and made several small flows of salt water and oil. Operations were suspended until tanks could be built, and by to-morrow or next day it will be drilled in and its correct status known. The new venture is located in the neighborhood of three thousand and one-half miles from Weston in the same direction. Some claim that the well is derived from the salt sand formation. Many wild stories were set in circulation, but the oil which was made the well range in production from 200 barrels to 1,000 barrels a day. The owner, however, said when interviewed about it, it would make a twenty or twenty-five barrel producer when tested. There are a few who claim to know all about Camden, but they do not believe the new venture will make on the start-off at least fifty barrels a day. There is also a lurking suspicion in the minds of some that deepened drilling will produce a different change, and it would cause them no surprise to see a gusher developed.

However this may be, the territory in this vicinity is in good demand and that which is not already taken up is being leased as rapidly as possible. If any better than the old Camden No. 1, it is not the least likely the market will be materially affected. Already there are two or three new rigs building near the new well, while half a dozen more locations have been staked off by different parties.

This week a test well of some importance was completed in the Cadiz pool, which proved an entire failure and condemned a considerable amount of prospective territory, which until the well was completed looked reasonably good.

The different shallow sand pools of West Virginia still continue to make a good record. In fact the shallow sand diggings are showing up better than any of the other formations, and in operations continue in the future to be as successful as they have been in the past three months, quite a large production may be looked for this formation.

A new well was found recently in the Big Injun formation a little in advance and to the east of the old developments in Washington county, and in the Scottown district. It was drilled by the Henderson Oil Company and has an official record of 215 feet. It is looked upon as one of, if not the most important, well drilled in this pool for some time, and which undoubtedly result in considerable more new work in the Big Injun formation.

The United States Oil Company in the past two years have been one of the most successful corporations engaged in the production of oil in the southwest fields. Two years ago, when Mr. W. H. D. Chapin took charge of the company's affairs, their production was about 650 barrels a day, but under his supervision it has increased to over 2,000 barrels a day, which is a record hard to beat. Operations cover the pools in Wetzel, Marion, Pleasants, Wood and Harrison counties in West Virginia, and Harrison, Monroe and Washington counties in Ohio. This company has under lease 10,000 or 12,000 acres of territory and has 300 pumping wells. At present, owing to the bad condition of the road, they are running but three workings of tools. This week, Theodore Barnard & Company bought the Strickler Oil Company property, on a ninety-day lease, consisting of three wells and one hundred acres, for \$12,000—no production.

THE SCOUT.

An Old Newspaper Man says about Grape-Nuts.

Arthur M. Hull, manager of the St. Paul Globe, thinks advertisements written to inform other people about food and its value, but are not intended for newspaper men themselves, and yet of all men, newspaper men require good nourishing food to rebuild the brain and nerve centers. (They will agree that this is not a joke.) Mr. Hull says: "I wish to give you an unqualified testimonial for Grape-Nuts. I have used your Postum Cereal for about two years. I have seen your advertising for Grape-Nuts in the Globe as well as other papers, and have appreciated it from an advertising standpoint, but some way I never bought any until about a week ago. Since then I have practically lived on it. I think it is, without exception, the finest preparation of any food product that it has my good fortune to taste, and my enthusiasm prompts me to write this note. Wishing you all kinds of success."

Herman Coss' Saloon. To-day, Herman Coss opens a new saloon at 401 Main street, North End, where he will be pleased to greet his friends, and assure them excellent treatment and first-class service.

"NEGLECTED colds make fat graves," says Dr. Wood's New and Improved Syrup helps men and women to a happy, vigorous old age.

LOAN EXHIBITION.

Committee on Books, Curios and Relics Holds a Meeting and

APPOINTS SUB-COMMITTEES

For Each Ward of the City and the Suburban Communities—The Sub-Committee Are to Begin Their Work Immediately and Complete February 1—War Relics Committee Meets This Afternoon.

One of the most important committees working for the success of the Loan Exhibition for the benefit of the City Hospital, is that on books, manuscripts, curios and relics, of which Judge G. L. Cranmer is the chairman. This committee met yesterday afternoon at the rooms of the chamber of commerce, Judge Cranmer presiding, and with a good attendance.

It was decided to appoint sub-committees for each ward of the city, and one for the suburban communities out of the pike. Chairman Cranmer announced these, as follows:

First ward—Mrs. Flora Williams, Mr. Alfred Paul, Mrs. James Matthews, General Alfred Caldwell, Mrs. J. N. Vance.

Second ward—Mrs. J. L. Sooy, Mrs. S. J. Bates, Miss Maggie Ott, Dr. L. D. Wilson, Dr. R. M. Baird, Dr. R. J. Reed, Mrs. Sidney Laughlin.

Third ward—Miss Sue Campbell, the Misses Cummins, Mrs. T. B. McNeil, Mrs. G. L. Cranmer, Mrs. F. H. Lange, Mrs. W. W. Arnett.

Fourth ward—Miss Jennie Taney, Mrs. S. L. Brice, Mrs. James Neill, Miss Sue Metcalf, Mrs. T. M. Garvin, Dr. Harriet B. Jones.

Fifth ward—Mrs. C. Russell Hubbard, Miss Minnie Lohse, Miss Edna Bingle, Dr. J. Schwin, H. F. Behrens.

Sixth ward—Miss Anna Irwin, Mrs. W. B. Lewis, Miss Rappet, Mrs. W. W. Irwin, Miss Lizzie M. Schulbach.

Seventh ward—Mrs. H. H. Harrison, Dr. E. C. Myers, Mrs. E. C. Myers, Mr. Robert McCabe, Mrs. Tinker, Mrs. Cecil A. Robinson, Mrs. James B. Taney, Mr. Alex. Mitchell.

Eighth ward—A. J. Schultze, Prof. F. H. Crago, Mrs. R. B. Bigger, Frank W. Bowers, Mrs. Stephen Waterhouse, Mrs. Joseph Seybold, Mrs. Isadore Fulton.

Triadelphia district—Mrs. J. W. Paxton, Mrs. Percy Norton, Mrs. J. D. Holloway, Mrs. E. A. Hosack, Mr. J. D. DuBois, Mrs. J. J. Holloway, Mrs. E. A. Hosack.

Echo Point and Edgington—Mr. O. C. Dewey, Miss Mary Vance, Mrs. J. D. DuBois, Mrs. J. J. Holloway, Mrs. E. A. Hosack.

Pleasant Valley—Mrs. M. T. Carr, Mrs. Percy Norton, Mrs. S. S. Bloch, Park Place to Elm Grove—Mrs. J. W. Paxton, Mrs. Harper, Mr. I. F. Jones, Mrs. C. H. Simpson, Mrs. Forbes.

Addressing the committee, Chairman Cranmer spoke of the necessity of beginning work immediately, protesting it energetically and finishing not later than February 1, when the catalogue is to be compiled. The sub-committees are to make a campaign of investigation, unearthing all the old manuscripts, books, curios and relics that they have in their possession, and attractiveness of the Loan Exhibition. The committees will take memoranda of such articles and the names and addresses of the persons having them, which are to be turned over to Chairman Cranmer, who will take steps to secure the articles for the exhibition.

The committee on war relics, of which Colonel Robert White is the chairman, has been called to meet this afternoon at the rooms of the chamber of commerce. The hour of meeting is 2 o'clock, and a full attendance is desired.

DIED.

WOODS—On Thursday, January 12, 1900, JOSEPH J. WOODS, aged 6 years. Funeral from the residence of his mother, Woodside, Saturday at 10 o'clock a. m. Friends of the family invited. Interment private at Stone Church cemetery.

NORTH—On Thursday, January 12, 1900, at 1:30 a. m. SUSAN A. NORTH, aged 72 years, 7 months and 1 day. Funeral Sunday, January 21, at 2 o'clock from her late residence, No. 23 Thirty-fourth street. Interment at Mt. Zion cemetery. Friends of the family invited.

MOORE—On Friday, January 13, 1900, at 6:10 o'clock a. m. ADA LEE MOORE, daughter of B. A. and T. H. C. Moore, aged 32 years, 10 months and 1 day. Funeral will take place Sunday afternoon, January 21, at 2:30 o'clock, from the residence of her parents, No. 277 Chapline street. Interment private at Peninsular cemetery.

GLENN—On Friday, January 13, 1900, at 1 o'clock a. m. MARIA, wife of John Glenn, aged 69 years. Funeral services at family residence, above Top Mill, this (Saturday) afternoon, at 4 o'clock. Friends of the family respectfully invited to attend. Interment at Peninsular cemetery.

"DEWEY DAY"

General Committee is Called to Meet Next Monday Evening—Many Details Remain to be Disposed Of.

A meeting of the "Dewey Day" general committee was to have been held last night, but owing to previous engagements by some of its members the meeting has been postponed, and will be held next Monday evening, when it is desired that every member be on hand, as there remains much detail work to be taken care of, involving the appointment of several additional sub-committees.

Chairman Garvin has written to General Passenger Agent Challenger, of the Ohio River railroad, asking that the one fare rate be extended to Huntington and intermediate points. This request is made at the desire of many of the state people who desire to be here on "Dewey Day." The rate on the Baltimore and Ohio extends eastward to Keyser, and on the other roads the one hundred mile radius is covered. Major McGee, of the First battalion, First regiment, U. S. K. of P., called on Chairman Garvin yesterday, and said the Knights would turn out in the parade. General James A. Lancaster, the brigade commander, stated last night that he would call a meeting of the officers to act on the invitation.

Denied the Request.

Members of the city council committee on real estate yesterday afternoon made a tour of the city commons, on the second ward hillside, to investigate the protest against an increase of rent, and after listening to the tales of woe, the committee decided to recommend that the rents be levied at the old level.

Workhouse Talk.

The council committee on police met last night, but adjourned without transacting any business, other than an informal discussion on a new workhouse to replace the present Morris Castle. Agitation for a new and better structure springs up spasmodically, and it is generally recognized that something must be done soon. The foulness of the dilapidated place calls for a remedy, while a prisoner desiring to gain his liberty need only fall right hard against the sides.

AMUSEMENTS.

"The Katzenbach Kids" tickled the risibilities of another large audience at the Grand last night. Edward Blondell is inimitable in the part which he has created, of a stumbling, awkward boy, who is always saying or doing something funny, and has a host of quaint expressions. Miss Libbie Blondell, and the other members of the excellent cast, merited the enthusiastic applause which rewarded their efforts in vocal or terpsichorean work. The production is certainly a big laughing matter, and the theatre will doubtless be crowded at the matinee and night performances to-day.

"The Great Train Robbery." In "The Great Train Robbery," which comes to the Grand the first of next week, the playwright has combined a thrilling and fascinating plot, in which the stronger passions are brightly foiled by plenty of unique fun and frolic. The painter has supplied a splendid scenic setting of fac-similes of some of the grandest and most beautiful scenery on earth; the skilled mechanic has furnished resemblances and accessories of rare ingenuity, and the general director has been to great expense and trouble in securing the genuine living material for the cast, even including a monster, mirth-provoking Rocky Mountain bear. Between sunrise and sunset the stage presents nothing better suited to the popular taste.

The Players.

The Players, having decided to fol-

STRENGTH AND VIGOR THE WORLD'S NEED.

DR. GREENE'S NERVURA

BLOOD AND NERVE REMEDY

The One Sure Remedy for the World's

WEAK, SICK, and SUFFERING.

What is it all the world has for? Strength, energy, the electricity, the vigor and power of youth. What makes these things? Why, fiery blood, and snapping nerves, iron strength, superb health. And whence comes superb health? By the use of Dr. Greene's Nervura blood and nerve remedy (nature's own medicine), we may build our weakness into strength, our exhaustion into vigor, our prostration into renewed life and energy.

Dr. Greene's Nervura is the remedy of remedies—the one sure and perfect cure for disease—the medicine which makes people well. It is the renewer of life, the true tonic and restorative, which gives appetite and enjoyment for all life's pleasures. Everybody should take it, if well to keep so; if ill to make yourself well. Take it—and be strong.

Mr. F. F. Dearth, Woodville, N. H., says:— "I was taken sick and was unable to work for about a year. I employed a doctor for a year, who did not seem to hit my case. I was then told of Dr. Greene's Nervura blood and nerve remedy and at its use I felt better. I have not been well since, and I heartily recommend it to all."

Dr. Greene, 35 West 14th St., New York City, is the most successful specialist in curing nervous and chronic diseases. He has remedies for all forms of disease, and offers to give free consultation and advice, personally or by letter. You can tell or write your troubles to Dr. Greene, for all communications are confidential, and letters are answered in plain sealed envelopes.

low their plan of last season in re-serving seats by subscription, for their coming production of "A Bachelor's Romance," will, in order to give every one the opportunity of securing choice seats, open a registering list at the Opera House box office, next Monday and Tuesday, at 9 o'clock a. m. Each person registering will give the number of seats desired and they, in turn, as they register, will be called on and given choice of seats to the number asked for. "A Bachelor's Romance" is the play made famous by Sol Smith Russell, and is one of his very best. The story is a beautiful one full of humor and pathos.

MUTUAL SAVINGS BANK.

"Rented Houses Are Not Homes"—Poor Richard.

THE MUTUAL SAVINGS BANK, No. 1521 Market street, has money to loan on real estate, in sums large or small, on easy terms of interest and repayment. No commissions or premiums are charged. Principal and interest can be reduced semi-annually.

JOHN FRIEDEL & CO.

LAMP SALE LESS... 1-3 PRICE.

Bronze Reception Lamps.

For a few days only.

JOHN FRIEDEL & CO.,

1119 MAIN STREET.

25 Reasons For..... Standard

SEWING MACHINE. Solid facts. No "ifs" or "ands" or "buts," no supposition or guess work, just the truth, the whole truth, and nothing but the truth.

Vibrators,

\$30.00,
\$35.00,
\$40.00.

Rotaries,

\$45.00,
\$50.00,
\$55.00.

ALL THE TIME YOU WANT IN WHICH TO PAY FOR IT.

- 1—"The Standard" Rotary has the biggest bobbin of any lock stitch machine. Holds 100 yards of No. 80 cotton.
- 2—Bobbin more quickly wound.
- 3—The first stitch perfect without holding ends of threads.
- 4—The tension is released when taking out the goods.
- 5—The finished goods are not drawn or puckered.
- 6—Less noise than any other machine.
- 7—Runs 50 per cent lighter than old style machines.
- 8—Is the most rapid sewer—makes two motions of the treadle to three of other machines in sewing the same length seams.
- 9—Tensions not changed by change of speed, size of thread, thickness of goods nor length of stitch—what other machines can do as much.
- 10—Most elastic stitch. Thread does not break when seam is stretched.
- 11—Does not break thread when machine is run backwards.
- 12—The "Standard" Rotary Needle dips only once when making a stitch—old style shuttle needles dip twice—hence that much more strain and wear.
- 13—The "Standard" Rotary Shuttle never stops when the machine is in operation. Old style shuttles start and stop twice to each stitch. Just think of the extra strain and wear that this makes! The "Standard" Rotary Shuttle moves onward continuously without a jar.
- 14—Shortest needle used in lock-stitch machines—therefore less liable to bend and skip stitches.
- 15—Owing to the construction of the shuttle always comes in proper relation to the loop, hence almost absolute freedom from stitch skipping.
- 16—Shuttle so constructed that it cannot hit the needle—hence no broken needles from this cause.
- 17—Protection and packing of the needle bar and construction of take-up and feed make less liability to all goods than in other machines.
- 18—The face plate can be taken off by a thumb-screw, thus enabling the operator to clean off and oil the parts without displacing any of them.
- 19—Feed motions all positive—no springs used—hence machine will feed over all thicknesses of goods and seam without "chewing" the cloth, no matter what the length of stitch.
- 20—Will wear twice as long as other lock-stitch machines.
- 21—Every part is independent of every other part, and can be replaced at a trifling cost. Therefore you can keep a "Standard" Rotary practically new a life-time.
- 22—Bran new set of attachments, self-adjusting, and fastened to the presser bar in place of the foot.
- 23—Stand wheel and treadle run on adjustable steel points, which insures the easiest, smoothest bearings known to mechanics, and the wear is for a life-time.
- 24—Bent woodwork of the finest construction and finish known to art.
- 25—Automatic keyless drawer and cover locks, peculiar to the "Standard."
